

At the touch of a button, a fully powered foot and calf massage robot presents itself.

The HT-1650 is all dressed up for the occasion, with the same attention to style and finish as the rest of the chair. No other massage chair can boast a fully retractable foot and calf massager.

FEATURE SPECIFICATION

FOOT/CALF MASSAGER	3 speeds, 2 automatic programs, integrated wave vibration, under foot legrest acupoint
3D REMOTE CONTROL	Acupoint direction, 8 auto programs including demo mode, full function control, massage/comfort number, lumbar heaters, electric recline, electric footrest and calf/foot massager deploy, countdown timer
RAPID SEAT MASSAGER	8 pod, 2 stage, pulsing air system
ACUPRESSURE SENSING	Integrated Acupoint sensing with voice response
LUMBAR HEATERS	Single stage, left/right arm wave vibraton
MCN	Massage Comfort Number: Seven intensity levels let you adjust massage pressure ranging from gentle to invigorating. Robtic Massage Technology™ innovation!
VOICE RESPONSE	With Voice Response activation the HT-1650 will audibly affirm your selection of any of the 8, on-board massage programs. Voice response will also direct you through the Acupoint Detection process, aligning our exclusive Robtic Massage Technology™ with your personal Acupressure points.
AUTO PROGRAMS	1. Sore Muscle Relief 2. Sports & Back Therapy 3. Leg/Foot/Hip Therapy 4. Neck/Shoulder Relief 5. Full Body Stretch 6. Morning Wake-Up 7. Night Time Soothing 8. Auto Demo
UPHOLSTERY	Neck support pillow, Ergo lumbar pillow/pad, integrated Visco foam seat

Rolling

Compression

Calf Massage

Rolling: Feels like the gentle hands of a massage therapist pressing firmly on one side of your spine, then the other. It relieves tension and loosens the muscles to prepare your back for deeper massage.

Kneading: Feels like thumbs pressing firmly in a circular motion on both sides of the spine. This therapeutic motion goes deeper, lifting and stretching muscles to improve circulation.

Compression (HT™ exclusive): This exclusive technique pushes on muscles alongside the spine, and inward toward the spine itself, to improve mobility and posture.

Percussion: Emulates the feeling of fists tapping on back and shoulder muscles. This is the deep muscle therapy popular in sports medicine that flexes spinal joints, relieves pressure, and invigorates the entire back.

Simultaneous Operation: Three motors are employed to combine kneading, percussion, and rolling techniques providing an intense, vigorous massage emulating the popular deep-tissue technique.

experience the human touch™

Double-top stitching puts the emphasis on quality and aesthetics.

In addition to extensive manual massage settings, Human Touch™ has designed eight automatic massage programs right into your remote control to help enhance your health and well being.

Our Acupoint Detection System ensures accurate, personally tuned massage mapping throughout your dawn to dusk activities.

experience the Human Touch™

Our patented Robotic Massage Technology™ works like the wrists, arms and hands of a professional massage therapist to yield a Robotic Massage® that feels remarkably human. There is nothing like it in the world.

Strategic "Soft Window" allows the Human Touch™ robot to effectively provide relief from tense neck and shoulders.

Acupoint detection automatically locates acupressure points for effective massage targeting.

Massage/Comfort number is built into upholstery for user controlled massage intensity and comfort.

In addition to the neck support pillow, oversized ergo pillow provides luxurious support between massage sessions.

Exclusive, 8 mode, fast air system provides analogue pressure pointing with pulsing force.

Arm rest vibration improves circulation.

Advanced Human Touch™ robot provides a multitude of combinations of massage techniques and professionally designed programs.

You certainly can't see it, but you can definitely feel it. Robotic Massage Technology™ makes itself known throughout the chair with ergonomic precision, and mix & match custom combinations.

Visco elastic foam seat cushion

2 programs and 3 settings are used to control true Human Touch™ massage that circulates blood toward the heart.

Foot and calf vibration enhances circulation and soothes tired feet and legs.

An accomplished 3-D wand functions as the control console for the full range of massage robotics on-board the HT-1650. Innovative and convenient, the intuitive control console keeps the user informed of all elements of his/her selected massage program.
